CareLock Antiligature

Wireless AntiLigature access control in one neat solution

Access control is about controlling access to your premises, or a specific areas of your premises, to protect your people and your property. CareLock provide cost effective access control with central management and integrates seamlessly with Paxtons leading Net2 system giving you simple, wireless electronic access control.

CareLock has been especially developed for environments needing AntiLigature to meet specific needs, such as Mental Health Hospitals and alike.

The CareLock incorporates an AntiLigature handle system, moulded blocks and guards to assist in reducing the ability to gain a ligature on the device.

For convenience the system is designed as a simple replacement to your current door handle or as a cost effective alternative to installing a complete locking system needing main power and control equipment etc. CareLock is the perfect addition to your Paxton Net2 system allowing you to link in areas that either aren't easy to cable or in areas where you simply need cost effective control.

The Convenience of Wireless Access Control & AntiLigature

- Easily retro-fits into an existing environment
- Minimum disruption to patients and staff
- Doesn't require mains power
- Overcome tricky cable runs and hard to reach places
- Add additional doors when you need them
- Suits anti-barricade doors and doors mounted on "Z" hinges

Discover the Benefits of a system that is beyond simple access control

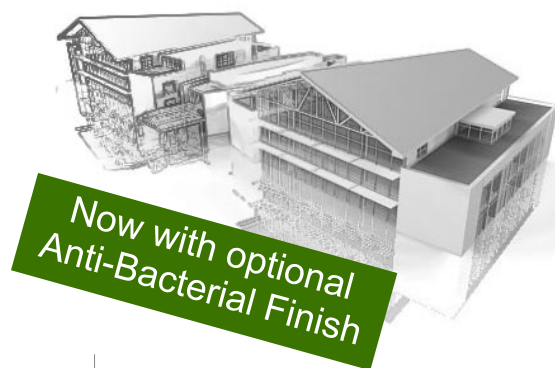

- CareLock combines with the market leading Net2 access control for an enormously simple to manage software and access control deployment.

Ideal Solution where price is critical

- CareLock provides an economical and compact solution, saving you money on wiring and hardware

Anti-Bacterial Finish (tested to EN13697:2001)

- CareLock is given a special anti-bacterial finish and can be used to protect against a broad range of pathogens and is effective against MRSA, SARS, c. difficile, e.coli, as well as the much publicised swine flu.
